

# oneplus<sup>corp</sup> Baler Monitoring System

Control Security & Accountability

## BALER BOSS<sup>TM</sup> BALER CONTROL SYSTEM

product summary

**BALER BOSS Control System** is specifically designed for security, control of access to use of balers and accountability of bales produced.

ACCESS

THE POWER OF

ELECTRONIC

TECHNOLOGY FOR

BALER CONTROL,

SECURITY AND

ACCOUNTABILITY

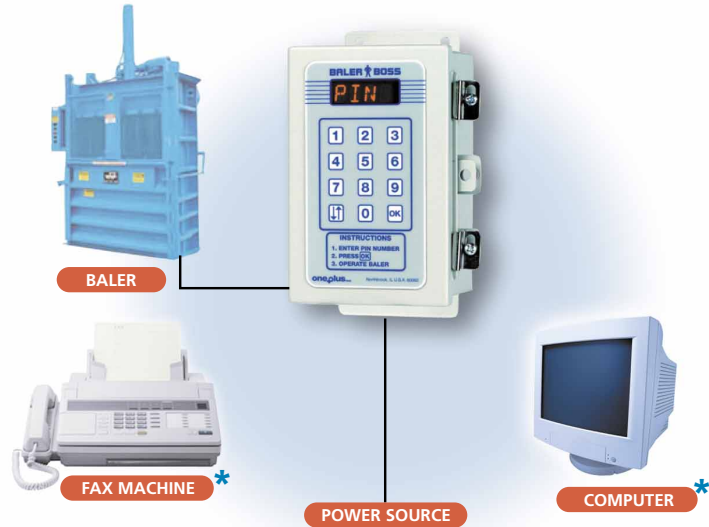

### Features / Benefits

- + The System allows only authorized, trained personnel of required lawful age to have access to operate a baler.
- + Easy to use. The BALER BOSS has a Keypad which can be used even with a gloved hand.
- + BALE EDGE SOFTWARE provides remote communications capability for one baler or thousands.
- + Fax option enables Baler Boss to fax a pick-up request to one or two fax machines.
- + Features a large bright LED display which provides the user with 'how to' prompts.
- + The user needs only to key in their unique four digit PIN to access use of the baler.

OPTIONAL  
BALERPASS

**TYPICAL CONFIGURATION DIAGRAM**

**Three methods of accessing the use of the baler are:**

**1. KEYPAD**

Easy to use, the Baler Boss has a keypad which can be used to enter PIN, even with a gloved hand.

**2. BALER PASS (OPTIONAL)**

A small key fob with an imbedded computer chip about the size of a dime. Designed for rugged use. To gain access to use of the baler, touch Pass to Reader on the monitor.

**3. ID MAG STRIPE CARD (OPTIONAL)**

Durable with a high density stripe. To gain access to use of the baler, swipe card on Reader.

**\*OPTIONAL**

**Additional Features:**

- Authorized users can be added or locked-out. Depending on the BALER BOSS model, these functions can be performed either on-site or remotely via a modem.
- Assists in providing information to audit charges and credits provided to your company by the hauler / recycler company
- In addition to assisting the user with instructions on how to use the BALER BOSS, the digital LED display can provide management with the following information, upon request:
  1. A count of the current number of bales made
  2. Total of bales made within any time frame, up to one year

**OPTIONAL BALE EDGE SOFTWARE will enable the following:**

1. Remotely set up a pre-determined number of bales made that will automatically trigger a fax or modem call to be sent to the hauler/recycler company requesting a pick-up.
2. Two-way communication which, for example, would enable a hauler/recycler to communicate with the BALER BOSS to determine how many bales have been made and are waiting for pickup.
3. Activate the Preventative Maintenance (PM) feature. When a predetermined number of total hours which the baler has run and/or total number of bales which have been made, the BALER BOSS will automatically alert the company which services your baler. Extends the life of the baler.

<p><b>OPERATING SPECIFICATIONS:</b></p> <ul style="list-style-type: none"> <li>• Constructed to operate indoors or outdoors.</li> <li>• Retrofittable to most new or used balers</li> </ul> <p><b>SPECIFICATIONS:</b></p> <ul style="list-style-type: none"> <li>• System has power failure protection. Automatic self-starting after any short or prolonged period of power outage.</li> <li>• System has solid state memory. Information and settings are protected against loss. The System does not require batteries.</li> </ul>	<p><b>Power Requirements:</b> 12 through 24 Volts AC / DC OR 120 Volt AC 60 Hz (Must specify voltage when ordering)</p> <p><b>Operation Temperature:</b> -35° F to + 135° F</p> <p><b>Enclosure / Dimensions</b> NEMA weatherproof, 14 gauge steel. Hasp for locking W 5" x H 8" x D 4" Designed for indoor or outdoor use.</p>
