

WasteView™

The World's First Internet-Based Compactor Monitoring System

WasteView™ harnesses the power of the web to slash and control waste removal costs. It tracks fullness status, pick-up history and much more. Works together with WasteEdge® Monitors, which automatically call in pick-ups at just the right time, and log the results.

- Display the status of one or thousands of compactor containers over the Web.
- Graphically view compactor activity and operation
- Easy-to-use interface, requires no training!
- Download reports into other Windows applications such as Excel®
- On-the-job, 365 days of the year, 24 hours a day
- Can be viewed from an unlimited number of locations on a standard PC with Web browser

WasteView PLUS™

Offers user interactive capability to change full and empty pick-up pressure settings and phone numbers. Provides pick-up notification by e-mail. Allows for up to 4 internet address recipients.

Access the power of WasteView from any computer, anywhere, at any time!

With just a few keystrokes, the WasteView system will provide a graphical, real-time view of graphs and reports on one or all of your WasteEdge Monitor-equipped compactors.

Reports will track pickups and compactor operation. More efficient operation can be realized through this unprecedented control of the waste disposal process.

WasteView provides instant compactor container fullness status, hauler pick-up time and dates, lists of compactors which need to be emptied and which have already been emptied.

Screen reports can be sorted by compactor site, region, hauler or account. Reports can be created with as much detail as needed. Verification of pick-ups are always a keystroke away.

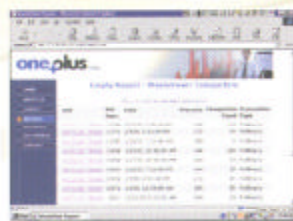

Reports and graphs can also identify compactor malfunctions before they affect service.

- Patent-applied-for system tracks fullness status, pick-up history and much more.
- Exclusive polling feature provides instant graphical status of any compactor including pickup activity, date and time of each pickup and much more
- Analyzes how the compactor is operating and when it is due for maintenance
- Displays easy-to-understand graphical reports
- Use with any Web-enabled computer and export data to such popular Windows programs as Excel

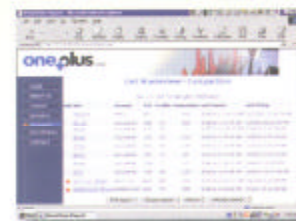

- Secure, password-protected access to compactor data on any standard Web browser
- Fullness status of all monitor-equipped compactors can be reviewed at any time, 24 hours a day on a standard Web browser

Information collected by WasteView not only helps to assure timely pickups, its reports can be used to document hauler invoicing for container pickups.

Imagine, one person can now monitor and manage hundreds of waste compactors worldwide, saving man hours and improving hauler performance!

Create reports to suit your need, like this "Empty Report."

View the status of one or thousands of compactors

WasteView Service Plans

The WasteView Service Plan offered by One Plus Corporation provides you with total access to all of the capabilities described.

A variety of Plans are available based on the number of compactors monitored. For complete details, contact One Plus Corporation.
