Designed for:
- Anywhere Space is limited
- Restaurants
- Nursing Homes
- Fast Food Locations
- Shopping Plazas
- Supermarkets
- Hospitals
- Schools

The most economical Self-Contained Front Load Container with remote power unit, designed for wet or dry waste and easy pickup. Designed for those generating a minimum of 20 cubic yards of refuse a week, the Pak-Container is liquid tight with continuously welded seams that eliminate leaking to maintain a clean, friendly environment.

www.PTRCO.com
The PSC is compatible with a majority of front and rear load vehicles. The low profile makes it easier and safer for drivers to see over the unit. It features a remote power unit and a Tri-Voltage motor with quick disconnect which allows for ease of service. These features make the PSC one of the most economical and simplest to use self-contained front or rear loading containers on the market.
